KEY FIGURES 2025

Sales	460.6 million
EBITDA	27.7 million
Adjusted EBIT*	4.6 million
Production sites	7
Employees	~2.500

*before non-recurring charges

Over 50 years of history and global leadership in kitchen extraction systems. It is a cutting-edge company specialised in the production of kitchen extraction systems, hobs, ovens, and wine coolers, all of which are renowned for their distinctive design and innovative features.

Seven production sites in Italy, Poland, Mexico and China.
Listed on the Italian Stock Exchange since 2006, in the Euronext STAR Milan segment.

These are the key figures of Elica Spa, achieved under the continued guidance of Francesco Casoli, Elica's Chairman.

Achievements inspired by values that have always guided each project, product, and activity:

- design, which seamlessly combines aesthetics and performance for an exceptional cooking experience;
- art, as a beacon of creative processes and working methods;
- innovation, facilitating technology capable of enhancing product features.

The main divisions of the Elica Corporation are:

COOKING

designs, manufactures, and commercializes Lhob, extractor hobs, hoods, induction hobs, ovens, and wine coolers, both under its own brand and for major international brands. Refrigerators and range cookers are also sold in the U.S. market. Dishwashers are additionally sold in the Asian market.

MOTORS

develops, produces and commercialize electric motors for the heating, ventilation and household appliances market through its brand EMC FIME.

Extraordinary Cooking.

Being extraordinary is a mindset, a way of being and thinking.

It's being inventive, it's embracing a pioneering spirit; it's an engine that ignites every day with new ideas, opportunities, and experiments.

For us, being extraordinary has nothing to do with being eccentric, elitist, or unconventional at all costs. It's about thinking outside the box, creating beauty, value, and delivering increasingly functional, user-friendly products. Being extraordinary is the art of inventing the future: in the kitchen and in life.

OUR HOUSEHOLD APPLIANCES

Under the Elica brand we design and manufacture over 150 models of:

Lhov

Extractor hobs

Wall-mounted, built-in, island, corner, ceiling and downdraft kitchen hoods

Ovens

Induction hobs

Wine coolers

The design of our household appliances feature exceptional aesthetics and high functional performance, within everyone's reach.

Sparks.

Ours is a story of sparks.
Strokes of genius, flames of fire, intense
passion brimming with ingenuity.
It’s an energy that ignited over 50 years
ago and has illuminated our challenges,
setbacks and comebacks.
And it continues to burn brightly.

ERMANN0 CASOLI

In 1970, Ermanno Casoli, a veterinarian from Fabriano made his first kitchen hood and founded Elica Spa. He was a visionary and art enthusiast who would soon become an unforgettable entrepreneur.

In 1972, he presented the first duct out hood for kitchens. In the same year he signed his first agreement with Philips. Success came immediately; the company harnessed vertical growth.

THE STRENGTH OF A FAMILY

A tragic event cast a shadow over those bright years: Ermanno Casoli passed away too soon in 1978. His wife Gianna Pieralisi and their teenage son Francesco Casoli inherited not only the company, but also its burdens, responsibilities, and above all, the founder’s exceptional perseverance. And so, just 4 years later, the first “Lego” hood was created in 1982.

In 1990, Francesco Casoli took the helm as CEO.

In 1994, the Serra San Quirico production site was opened along with the Elica Propulsion Laboratory: a state-of-the-art centre for safety, efficiency and electromagnetic compatibility testing of materials and products.

FLAMES

1995 was a most disastrous year: the Fabriano production site was completely razed to the ground by a fire. Operation “Araba Fenice” came to the rescue, rebuilding it in just 4 months, with the help of all employees.

REFOUNDATION

Starting afresh with renewed energy, countless highlights illuminate the years ahead.

In **1997**, the Ermanno Casoli Award was established. In **1998**, the Mergo production site was built. In **2001** Elica acquired control of FIME, a leader in the design and manufacture of motors.

From Italy to the world, mission complete.

In **2002**, Elica formed “Ariafina co. Ltd”, a joint venture located in Japan. In **2004**, OM, the first vertical hood, was introduced and in **2005** STAR the first chandelier-style island hood. In **2005**, FIME Polska was founded. In **2006**, Elicamex was founded and the Queretaro production site in Mexico opened. In the same year, Elica made its debut on the Italian stock exchange. The Ermanno Casoli Foundation (FEC) was established with the aim of fostering art and creativity.

AWARDS & ICONS

The path is marked with new achievements pursued through talent, determination, and vision.

In **2009**, Elica won the Etica&Empresa (Ethics&Enterprise) award and received Top Employer certification.

2010 kicked off with more iconic products: Feel, the first hood with sensory technology; Bubble, made of technopolymers. In the same year, Elica acquired “Zhejiang Putian Electric co. Ltd” located in China.

In **2011**, “Elica Trading Ilc.” was established in Russia, with offices in Moscow and Saint Petersburg. The company also won the Great Place to Work Italy & Europe award. Elica Polska was certified as Top Employer and won the “Gazele Biznesu” award.

2012 was the year of the 35CC, the 35-centimetre hood; and Sweet, a contemporary reinterpretation of an earlier design. It’s a hunch that leads to a breakthrough.

In **2014**, Elica France was established in France. In the same year, Ye, the first sculpture-like hood made of Cristalplant, was created. In **2015**, Elica opened offices in Barcelona Spain. In **2016**, the NikolaTesla line was launched: a revolutionary line of induction hobs with integrated an extraction system. In **2017**, Elica GmbH was established in Munich, Germany. In **2025**, Elica opens its first Dutch branch in Haren.

COMPASSO D’ORO AWARD

In **2018**, Elica won the Compasso D’Oro Award with the NikolaTesla One extraction hob.

In **2024**, Elica won this prestigious award for the second time with Lhov, the first All-in-One product.

In **2025**, Ariafina - Japanese brand of the Elica Group - won the Compasso d’Oro International Award.

TODAY

Elica is an industrial group listed on the stock exchange. It employs 2,500 people and has 7 production sites located in Italy, Poland, Mexico, and China. It is a cutting-edge company in the design and production of cooking appliances, present in more than 100 markets worldwide, that has made innovation its industrial and cultural mission.

It is a global leader in kitchen hoods and a European reference in the electric motors segment for household appliances, ventilation and heating.

Italian heart, international presence.

We are Italian.
Our headquarters have always been
in Fabriano, the town where we were
born and where our roots run deep.

Over the years, we have steadily expanded our presence in the international market. Today, we are an international player in cooking appliances, a global leader in the kitchen hoods sector, and the European reference in the field of motors for appliances and boilers.

ITALY

Our headquarters and R&D Elica Propulsion Laboratory (EPL) are located in Fabriano, in the province of Ancona, while the production site is in Mergo (AN). The Airforce production site is in Cerreto d'Esi, while EMC FIME, our heating and ventilation motors business unit is based in Castelfidardo, both not far from our headquarters. In November 2025, Elica entered into an agreement to acquire a 28% interest in the share capital of Steel S.r.l., a company based in Carpi (Modena).

EUROPE

We operate in:

- Poland, through Elica Group Polska. The production site is located in Jelcz Laskowice;
- Germany, through Elica GmbH;
- Spain, with a designated organisation;
- France, with Elica France - located in the centre of Paris.
- The Netherlands, with Elica Nederland B.V.

THE AMERICAS

We are present in Querétaro, Mexico with Elicamex, the production site and Sales office for Latin and North America. Our strategic proximity to these markets allows us to seize every OEM (Original Equipment Manufacturer) business opportunity and to launch or develop both new brands and products. In 2023 Elica established the American company Southeast Appliances Inc., hereinafter referred to as ELICA NORTH AMERICA, INC., to distribute both its own and third- party products in the southeastern areas of the United States, in addition to acquiring A.G. International Inc., a distribution company based in Canada.

ASIA

Our presence in Asia began in 2002 through a joint venture with Fuji Industrial, a Japanese leader in the production of kitchen hoods (of which we have held control since 2006). This resulted in the creation of Aria fina, the high-end brand of kitchen hoods in the Japanese market.

In 2010, Elica entered the Chinese market as a result of the acquisition of a controlling interest in the Chinese company Zhejiang Elica Putian Electric Co. Ltd., now operating under the name Elica Home Appliances (Zhejiang) Co., Ltd. As of July 2025, the company has become wholly owned by Elica following the acquisition of the remaining minority interest from Fuji Industrial Co. Ltd. Elica Home Appliances operates in its manufacturing facility located in Shengzhou. The acquisition of the entire share capital represents a key step in Elica's transformation plan aimed at positioning the Chinese subsidiary as a dedicated strategic sourcing and manufacturing hub serving exclusively the Group companies, thus supporting the development strategy of the Cooking business in the EMEA region and Elica's direct expansion into the North American market.

RUSSIA

In 2012, Elica increased its presence in this market, where it has been operating with its own brands since 1995, by acquiring 100% of the company Elica Trading LLC, which markets products under its own brands, such as Elica, Jet Air and Turboair.

Our Companies & Brands.

Cooking.

elica

It is the Italian brand at the forefront of cooking solutions and a global leader in extraction systems. With over 50 years of history, it combines technology and design to create intuitive, distinctive products that transform the cooking experience into something extraordinary.

This brand represents household appliances in the mid-to-low price range designed for the retail segment in the Far East and the CIS (Commonwealth of Independent States) markets.

This brand, created through the joint venture with Fuji Industrial, represents kitchen hoods specifically tailored for the high-end Japanese market. Ariaфина household appliances combine the finest Japanese technology with unmistakable Italian design.

arietta

This brand represents highly competitive kitchen hoods, specifically designed for the North American market. Reliability, functionality, aesthetics, and quality are an integral part of each product offering.

A renowned brand in the Russian market, it is especially popular due to its Made in Italy values: design that seamlessly integrates functionality, aesthetics, and cutting-edge innovation.

It is the brand that offers a line of Made in Italy products where high quality is expressed through design, functionality, and reliability.

Motors.

MOTORS FOR HEATING AND VENTILATION.

It is a company of the Elica group, European leader in the design, manufacturing and sale of electric motors for heating, ventilation and household appliances.

The know-how gained in over 40 years of history and the management of the entire production process has enabled EMC FIME the entire group to achieve top results in terms of performance, energy efficiency and new solutions in electric and hydrogen.

Inspire, aspire.

To breathe.

An involuntary and necessary action,
which our life depends on.

An act that becomes the paradigm of Elica.

A design that gives shape to air, transforming every moment in the kitchen into an architectural, aesthetic, and functional experience. Open to everyone.

It's a design that inspires and is inspiring. It always sets its sights high, delving into different worlds: art, culture, societal trends, and the changes in how we live. It changes perspectives, studies experiences, it stays one step ahead in order to successfully meet future needs. It envisions new household appliances for new spaces. For new people.

It's also a design that aspires to make life better. It captures fumes, controls vapours, enhances recipes and food preparations. It removes condensation, controls cooking processes, invents functions. It interconnects both household appliances and people, unleashing creativity.

And so, cooking becomes extraordinary.

Making History

1972

Lego
Firts Lego Hood

2004

Om
First vertical hood..

2006

Star
First chandelier-style hood.

2007

Missy
The first chimney hood.

2010

Feel
The smart hood with sensor technology.

Bubble
The first hood made of technopolymer.

2012

35CC
The first hood in a meere 35 centimetres.

Sweet
The timeless hood with a modern twist.

Édith
The first chandelier hood.

2014

Bio
The first natural wood hood.

Ye
The first sculpture-like hood.

2016

NikolaTesla One
The first Elica extractor hob.

2018

Haiku
Unique design chimney hood.

NikolaTesla Libra
The first extractor hob with integrated scale.

NikolaTesla Flame
The first gas extractor hob.

NikolaTesla Fit
The first extractor hob in a meere 60 centimetres.

2021

Open Suite
Modular hood.

2022

Ikona Maxxi Pure
Hood with integrated air purifier.

NikolaTesla Unplugged
Extractor hob with touch&feel knobs.

2023

Lhov
Hob, integrated hood and oven in a single product..

2024

Virtus Multi DD
Oven with an iconic design.

Memory of the future.

We share a visceral connection with the world of art. It’s a passion passed down to us from our founder, Ermanno Casoli.

It’s not simply about admiration. It’s more about embracing exploration and experimentation. It’s about constantly raising the bar. And with this, our creative process. It’s how we work. Artists are visionaries, free, open to all nuances of the future, even the darkest ones.

Their task is to show us new pathways, new ideas, and new opportunities. Our task is to translate them into tangible value and cutting-edge household appliances. Taking risks, exploring, and even making mistakes. Our founder instilled in Elica the belief that art is the master of life. An engine of creativity, innovation, progress.

It is him, to whom we dedicate our work.
It is him, the namesake of our Foundation.
The Ermanno Casoli Foundation.

FEC

The Ermanno Casoli Foundation (FEC) was established in 2007. Its aim has always been to promote activities in which art serves as an educational tool and method to spark innovative processes, even within the workplace. A pioneer in exploring the potential of the dialogue between art and business, the foundation has become a model for corporate training in Italy.

Every year, art comes into the company with a fixed programme of award-winning and internationally recognised events. There are two main activities: E-sstraordinario a cycle of workshops that puts the artist at the centre of the training process, and the Premio Ermanno Casoli, awarded to artists who show particular sensitivity to social issues and haring their work. Since 2013, these two projects have been complemented by E-sstraordinario for Kids, the art workshop dedicated to employees’ children.

All activities include workshops where internationally renowned artists work with Elica employees to create works of art that then remain in the company. This special collection was included in the volume “Global Corporate Collection” (2015), dedicated to the 100 most beautiful corporate art collections in the world and in the publication promoted by Confindustria “The sign of art in business. Italian corporate collections for modern and contemporary art” (2024).

F
E C

Going Beyond.

Going beyond what already exists.
Going beyond the usual limits,
standards and clichés.
This is innovation: the Elica way.

A passionate and practical approach that defies rules with expertise, research, and technology.
Developing business by exploring unprecedented solutions and new market opportunities.

Innovation is visionary and pragmatic. It gazes at the stars with its feet firmly planted to the ground. It springs to life in intentions and intuitions, but also through facts and figures.

Otherwise, it does not exist.

PATENTS

To date, we have filed around 1014 patents:

455

regarding cutting-edge technology

559

regarding new design solutions

ELICA PROPULSION LABORATORY

Part of the R&D division, EPL is the hub where we certify innovative products that are in compliance with safety, energy savings and electromagnetic compatibility related standards and regulations.

EPL is certified under UNI EN/IEC ISO 17025 standards and serves as a technological hub for research, verification and certification of materials, components, and finished products. Equipped with cutting-edge technological tools, it boasts a team of highly skilled professionals with expertise in electrical, mechanical, physical, electro-technical, and chemical engineering. The testing areas cover electrical and mechanical safety, energy efficiency, noise analysis and measurement, electromagnetic compatibility, and the reliability of materials, components and finished products.

People are at the core of what we do.

Our employees.
Our designers, researchers, engineers.
Our executives, our specialists.
Our independent contractors and our suppliers.
And our customers.

People are at the core of what we do, with household appliances designed to deliver the best performance in everyone’s kitchens.

And with that comes commitments involving actions, choices, and objectives, forging the path at a personal and, only after that, a professional level.

ELICA ASPIRATIONS LAB

It serves as the corporate hub to provide training and for the development of new skills. Open to employees and independent contractors, the aim of this lab is to explore capabilities and knowledge, guiding individuals towards personal, intellectual, and professional growth.

CASA ELICA

This villa in Fabriano is the historic residence of the Casoli family: an iconic location, a treasury of memories and opportunities for new activities. In 1970, this where the founder of Elica created his first hood; today, it welcomes events, meetings and initiatives that foster exchanging views, creativity, and experimentation.

A company, a business, a group, that continues.

An Italian company at the forefront of design and the production of cooking appliances.

Premi Corporate

Top Employer

It rewards companies that offer excellent working conditions, based on an HR Best Practices Survey.

Best Managed Companies

It recognizes entrepreneurial excellence in Made in Italy.

Marchio storico

It identifies products that embody the very essence of Made in Italy and have become symbols of Italian excellence and style worldwide.

Premio dei Premi

Established by the Presidenza del Consiglio dei Ministri, it is the national award for innovative companies.

Imprese x Innovazione

It promotes the spread of a 360-degree culture of innovation.

Premio Etica e Impresa

It promotes companies that integrate social responsibility, sustainability, and ethics into their business model, fostering virtuous practices.

Cultura + Impresa

Won by the Fondazione Ermanno Casoli, in collaboration with Elica, for the E-Straordinario project.

Gazele Biznesu

Promoted by the newspaper Puls Biznesu, it recognizes the most dynamically growing companies in Poland.

Premio Leonardo

Dedicated to entrepreneurs and companies that have distinguished themselves for high-quality innovation in their products and a strong international, commercial, and manufacturing presence.

Merito Empresarial

It rewards the excellence of products and services made in Querétaro, Mexico.
